Seeking a role that connects design and code at a company improving the human condition.

## Employment

### Ten-X (formerly Auction.com)

User Interface Prototyper / Product Designer

June 2015 - September 2016

- Researched, designed, and prototyped an iPhone app for bidders at REO auctions to help bring technology to our largest line of business.
- Designed new features for the Auction.com website.
- Developed high-fidelity interactive prototypes of new site features for usability testing.
- Developed web prototypes of UI components to help designers conceptualize responsive design, test new components' interactions, and compare potential design solutions.
- Lead our design team's effort to collect and codify our design patterns to develop our design language and provide a consistent experience across our products.

### UC Berkeley School of Information

Teaching Assistant

September - December 2014

- Answered student questions, graded assignments, and assisted with projects in Web Architecture. The course covers internet architecture and basic web development.

### Auction.com

Product Design Intern

May - August 2014

- Added new features to the internal functional prototype to facilitate user testing.
- Designed a mobile version of the search results page, and planned an interactive prototype.
